

Dear Englewood Resident,

We want to thank all Englewood residents for their cooperation in helping maintain a clean city. Each spring the City renews our exterior Property Maintenance Monitoring Program. To report a deteriorated property in your neighborhood, please call the City's Housing Enforcement Unit at (201) 871-6692.

The City of Englewood is an active participant in quality of life improvement programs. We are constantly looking for waste reduction programs, which is an environmentally positive way to conserve resources. We want to thank residents for making all of these programs a success.

Please keep properties in a clean and safe condition. Please curb and clean up after your pets and please do not speed. Observe speed limits.

The recycling glossary summarizes the disposal method of most household waste materials. Please follow these guidelines as closely as possible for better disposal service. Also, please remember that plastic bags are not a permitted container for recycling materials, and may only be used to dispose of garbage.

If you need to contact the Department of Public Works for assistance or information, listed below is the main number for your convenience.
